PROFESSIONAL SUMMARY

Software Engineer with experience building full-stack web applications using React.js, JavaScript, Spring Boot, MySQL, and AI/LLM integration. Worked on developing secure REST APIs, handling structured AI-generated responses, and building scalable backend workflows with clean and maintainable architecture. Focused on performance, reliability, and using AI tools to improve development efficiency while maintaining strong engineering practices.

TECHNICAL SKILLS

Programming Languages: Java, SQL, JavaScript, HTML + CSS

Technologies & Frameworks: React.js, Tailwind CSS, Redux, REST APIs, Redux Toolkit

AI / LLM: Generative AI, LLM Integration, RAG, Google Gemini API's, Prompt Engineering

Databases & Tools: MySQL, MongoDB (NoSQL), Postman, Git, GitHub, VS Code, Linux, Nginx, REST API testing

Relevant Coursework: DBMS, Data Structure and Algorithm, Object Oriented Programming, Software Engineering

PROJECTS

Ai-Powered CodeLens | [GitHub](#)

MySQL, Spring Boot, JavaScript, React.js, Gemini API's

- Built a Ai-Powered code review platform using React.js, Tailwind CSS, Java 25, and Spring Boot..
- Developed REST APIs with Spring Boot to process code and return results with severity, category, line number, and recommendations.
- Integrated LLM services through dedicated AI components, abstracting external model APIs from core business and application logic.
- Engineered MySQL to persist code submissions, review results, and analysis history.
- Deployed production builds on Render and Vercel, connecting hosted frontend and backend services through REST APIs.
- Delivered a polished React + Tailwind interface for creating, organizing, and managing AI-generated content workflows.

Ai-Chatbot | [GitHub](#) | [Live Demo](#)

Mongo DB, Node.js, JavaScript, React.js, Gemini API's

- Architected an LLM-powered conversational AI chatbot using React.js, Vite, and Tailwind CSS with a responsive and interactive chat interface.
- Integrated Google Gemini API using the @google/genai SDK to generate real-time, context-aware AI responses.
- Built REST APIs with Node.js and Express.js to handle chat requests, Gemini API communication, and structured response processing.
- Implemented chat history and conversation persistence using MongoDB, with dark mode in local storage for an improved experience.
- Deployed the application on Vercel, configuring serverless API routes and environment variables for secure production API integration

EXPERIENCE

Technohacks Solutions Pvt. Ltd

Frontend Developer

March 2025 – Aug. 2025

- Built responsive web pages using HTML, CSS, JavaScript, and React.
- Built RESTful APIs supporting authentication, data management, and structured frontend API consumption.
- Designed, documented, and aligned REST API contracts with frontend requirements, improving integration efficiency.
- Debugged and optimized application components, improving stability and performance.
- Wrote modular, maintainable code and participated in code reviews within Agile sprint-based development workflows.

EDUCATION

Prestige Institute of Engineering Management Research

B.Tech in Computer Science and Engineering

Sept. 2021 – June 2025

CERTIFICATIONS

Artificial Intelligence – ICTACADEMY

Cloud Computing – GDSC

Web Developer – TechnoHacks
